NES TurnRight - Lecture by Ambreen Zaidi

Ambreen Zaidi, Director, Youth Initiatives, NES helped to open new avenues for the students of our college towards making successful careers on January 17, 2014. She introduced NES TurnRight, which is a career advice network connecting college students, alums and industry professionals with similar interests to help guide choices during college.

She explained to the students how NES TurnRight will prove to be an effective gateway for the students to enter into the IT industry by connecting with mentors from various fields across the IT sector. The students were enthusiastic about joining the huge network of professionals.

She also spoke about how privileged the students are to have such opportunities available to them. She urged the students to make the most of this golden opportunity provided by NES TurnRight.
